## Introduction

Yes, I have no time and I'm lazy as hell, so I come with this quick and dirty coloring scheme refit for the original YF-19 and turning it into a VF-19A piloted by Aegis Focker in Macross Digital Mission VF-X 2 (for PS1). And just because I'm lazy and the fact that I only have a small amount of time available, I completely copied the instructions for the VF-19A from my YF-19 papercraft, because the parts are still the same, only the texture is changed (doing it kinda like Hasegawa Hobby Kits here). Well, have fun :D
