

MACROSS SEVEN VF-17D „Teal Version“

Papercraft by Sascha Kunzke

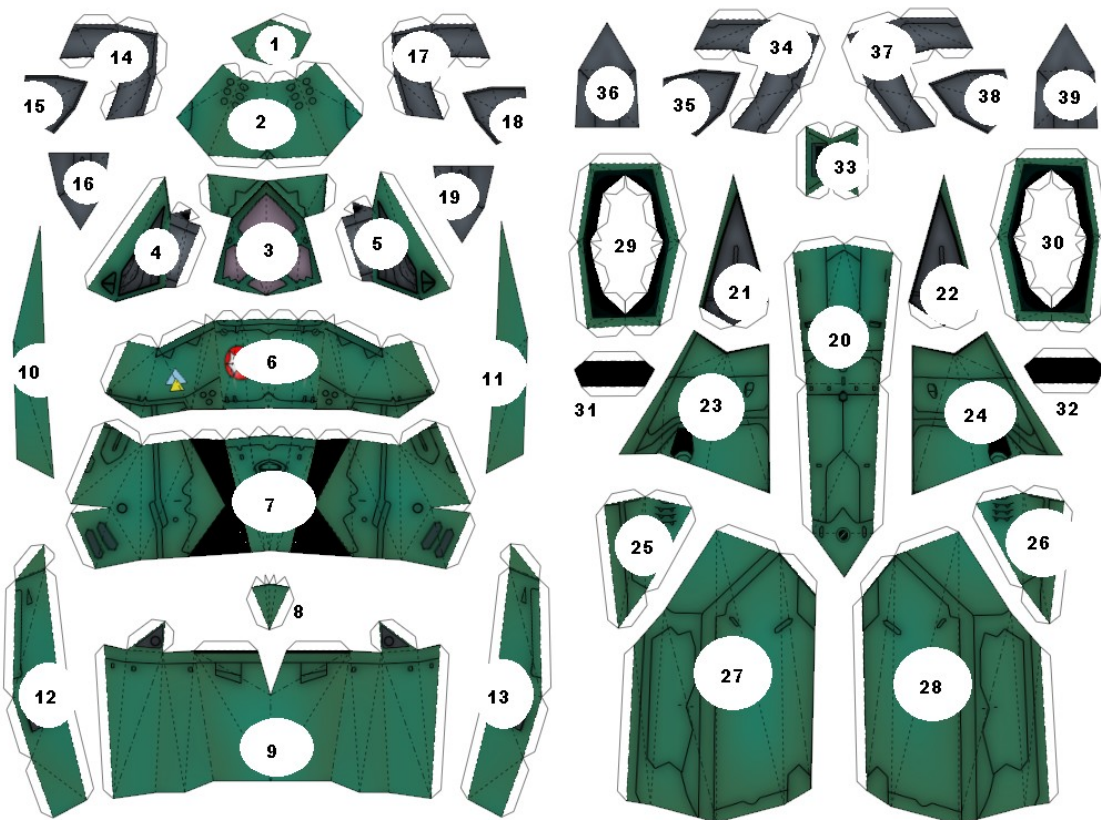

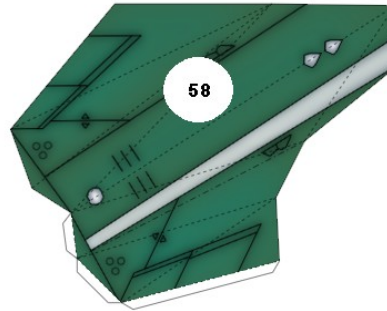

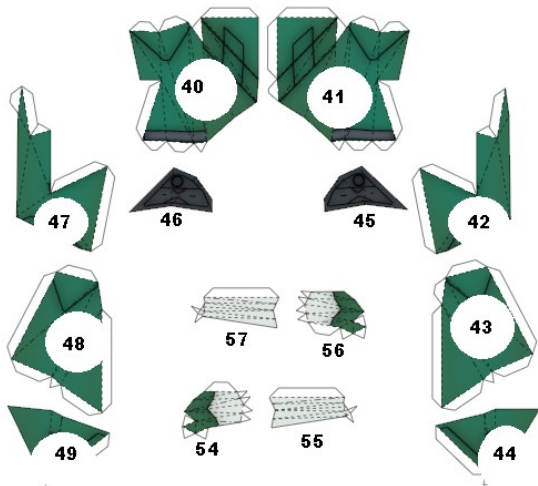

Introduction

I didn't wanted to do this papercraft in the first place, because I only thought of the VF-17D/S from Macross 7's pitch black Diamond Force. But then someone convinced me to do this one in the teal colored version. It didn't took me long to create the 3D model and the texture, and the first testbuild was done in about 4-5 hours (completely with outmarking, cutting and glueing). It felt like it was building itself on its own. I like it. Maybe you like it too.
